United States Foreign Trade

U. S. DEPARTMENT OF COMMERCE

Luther H. Hodges, Secretary

BUREAU OF THE CENSUS
Richard M. Scammon, DirectorSUMMARY REPORT
FT 950-I

NOVEMBER 1962

FOR RELEASE
January 14, 1963

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States general imports, unadjusted for seasonal variation, from \$1,438.9 million in October to \$1,451.6 million in November¹ reflected increases in imports from all areas except Latin American Republics. Changes in the dollar values of general imports from these areas were as follows: Canada, from \$325.3 to \$338.7 million; Western Europe, from \$411.2 to \$414.6 million; Latin American Republics, from \$294.6 to \$274.7 million; and "all other countries," from \$407.9 to \$423.5 million.

From October to November there were increases in imports from sterling area countries and O.E.C.D. countries in Europe, from \$264.9 to \$277.8 million, and from \$402.8 to \$403.9 million, respectively. Increases were reported in imports from all continents except South America.

The rise in imports from North America, from \$437.3 million in October to \$468.0 million in November, was primarily due to higher levels of imports from individual countries of this continent as follows: Canada (\$325.3 to \$338.7 million), as noted above, Mexico, from \$42.0 to \$51.1 million; Bermuda,

from \$0.2 to \$5.1 million; Dominican Republic, from \$10.7 to \$14.9 million; and Guatemala, from \$3.1 to \$7.1 million. Imports from Australia and Oceania rose from \$36.3 to \$45.3 million owing chiefly to an increase in imports from Australia, from \$23.1 to \$33.1 million. The increase in imports from Asia, from \$256.5 to \$262.2 million, was largely due to increases in imports from the Federation of Malaya, from \$14.6 to \$19.5 million; Arabia Peninsula States, from \$1.9 to \$5.0 million; and Iran, from \$4.6 to \$7.6 million. However, imports from Japan declined from \$128.5 to \$123.6 million. The slight increase in imports from Africa, from \$58.2 million in October to \$60.7 million in November reflected small counter-balancing changes in imports from most of the individual countries of this continent. The more noticeable of these changes were an increase in imports from British East Africa and Tanganyika from \$5.4 to \$9.0 million and a decrease in imports from the Federation of Rhodesia and Nyasaland, from \$5.2 to \$0.5 million. Imports from Europe increased from \$417.9 to \$420.0 million as increases in imports from West Germany, from \$83.0 to \$91.0 million; and Spain, from \$7.8 to \$10.0 million were largely offset by a decrease in imports from the Netherlands, from \$28.2 to \$18.0 million. The drop in imports from South America, from \$231.7 to \$193.6 million, reflected decreases in imports from Colombia, from \$38.9 to \$14.5 million; Chile, from \$21.3 to \$8.4 million; Peru, from \$21.6 to \$16.2 million; British Guiana, from \$5.1 to \$1.8 million; and Venezuela, from \$80.4 to \$77.1 million. However, imports from Brazil rose from \$42.5 to \$53.9 million.

¹On a seasonally-adjusted basis, total general imports were valued at \$1,420.3 million in November as compared to \$1,339.4 million in October. (See the November 1962 issue of Report No. FT 900-I.) Seasonally adjusted data are not available by country of origin.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics is the country of origin as defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may be a number of cases represent some other country, such as the country of purchase, landing, or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchandising or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude

United States import duties. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under \$100 and all informal entries valued under \$250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: NOVEMBER 1962 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Figures for 1962 are as originally issued and have not been revised to include published corrections. Figures for 1961 include all revisions published with the December 1961 reports, or earlier, and the special corrections announced in the January 1962 issue of this report, but do not include other revisions published during 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)
